

Bilateral Procedures

Reimbursement Policy ID: RPC.0006.2400

Recent review date: 01/2024

Next review date: 10/2025

Select Health of South Carolina reimbursement policies and their resulting edits are based on guidelines from established industry sources, such as the Centers for Medicare and Medicaid Services (CMS), the American Medical Association (AMA), state and federal regulatory agencies, and medical specialty professional societies. Reimbursement policies are intended as a general reference and do not constitute a contract or other guarantee of payment. Select Health of South Carolina may use reasonable discretion in interpreting and applying its policies to services provided in a particular case and may modify its policies at any time.

In making claim payment determinations, the health plan also uses coding terminology and methodologies based on accepted industry standards, including Current Procedural Terminology (CPT); the Healthcare Common Procedure Coding System (HCPCS); and the International Classification of Diseases, 10th Revision, Clinical Modification (ICD-10-CM), and other relevant sources. Other factors that may affect payment include medical record documentation, legislative or regulatory mandates, a provider's contract, a member's eligibility in receiving covered services, submission of clean claims, and other health plan policies, and other relevant factors. These factors may supplement, modify, or in some cases supersede reimbursement policies.

This reimbursement policy applies to all health care services billed on a CMS-1500 form or its electronic equivalent, or when billed on a UB-04 form or its electronic equivalent.

Policy Overview

A bilateral procedure is a procedure performed on identical anatomic sites, on opposite sides of the body (mirror image) that are performed during the same operative session, or on the same day by the same provider.

Select Health of South Carolina recognizes modifier 50, and adjusts reimbursement accordingly, when appended to a service to indicate that a bilateral procedure, as described above, has been performed.

Exceptions

The use of Modifier 50 is not applicable with procedures or codes that are bilateral in intent or that have bilateral in their description. Some examples of descriptions may include the terms "unilateral or bilateral", "one or both" and "bilateral."

Reimbursement Guidelines

Select Health of South Carolina determines eligibility for bilateral procedure reimbursement based on the CPT code descriptor and the SCDHHS fee schedule. Bilateral procedures should be submitted as a two-line entry when performed bilaterally. The procedure code on the first should be reported without a modifier and units = 1. The same procedure code on the second line should be reported with units = 1 and appended with modifier 50. Allowed procedure codes will be reimbursed per the SCDHHS fee schedule at a rate of 100% of the rate on file for the first line and 50% of the rate on file for the second line.

Definitions

Bilateral Procedure

Same procedures that are performed on both the left and the right side of a patient's body during the same operative session or on the same day.

Modifier

An indicator used in conjunction with a CPT code to denote that a service or procedure that has been performed has been altered by a circumstance without changing the definition of the CPT code.
